Finite Dimensional Vector Spaces. Consider the problem of finding the set of points of intersection of the two planes $2x + 3y + z + u = 0$ and $3x + y + 2z + u =$

Can one characterize the category of finite-dimensional vector spaces?

The answer is no, and an easy counterexample is provided by the category of finite-dimensional modules over a division algebra such as the

Non-zero component union graph of a finite-dimensional vector space
